# About Rhythm

Rhythm is an agile project planning and tracking platform designed to allow you to:

- Gather, prioritize, and manage backlog stories.
- Get comprehensive visibility of all your agile assets.
- Promote effective agile planning and execution.
- Easily track release changes and progress.
- Receive full visibility across the software delivery life-cycle.
- Use Scrum or Kanban agile methodologies.
- Integrate with other defect tracking and requirements management tools.

In addition to the Online Help, Installation Guide, and Release Notes, for more information about Rhythm, refer to [Microfocus.com](https://microfocus.com) and the [Micro Focus Community](#). The latest version of the Release Notes and all documentation can be found at [SupportLine](#).

# What's New in Rhythm

## 4.3

The following are the latest features for Rhythm:

### Kanban Support

This release of Rhythm introduces full support of the *Kanban* process framework. The sections below highlight all of the new capabilities.

#### FOR ADMINISTRATORS

The following features are available for Server or Project Administrators:

#### Use Scrum, Kanban, or Both!

Administrators can choose if the project uses Scrum or Kanban or both.

#### Project Configuration

---

Choose the Agile methodology for your project. You can change it at any time. Rhythm will display or omit relevant areas based on your selection.

#### Project Type:

- Scrum
- Kanban
- Scrum & Kanban

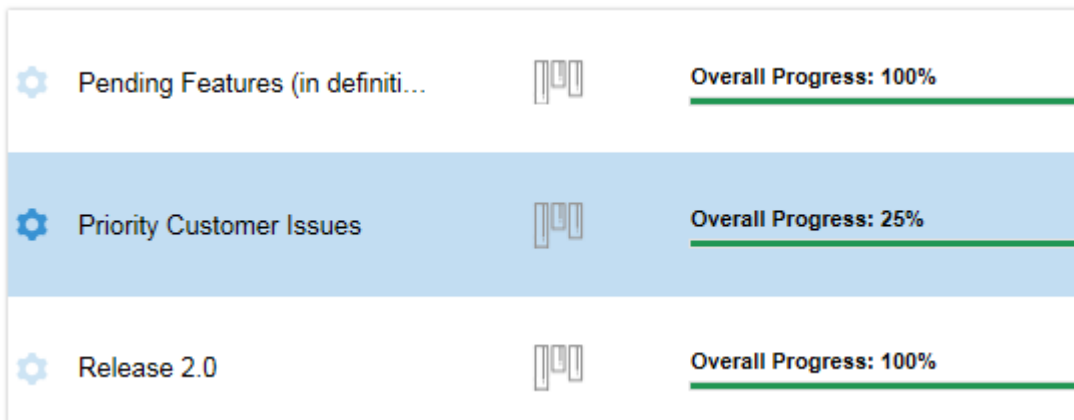

#### Kanban Boards Menu in Planning

When a Project is configured for Kanban, the **Planning** menu contains a **Kanban Boards** option:

#### Multiple Boards per Project

Use the **Kanban Boards** view to configure one or more boards for each Project. Click  to edit.

### Configurable Board Backlog Source

Decide how your Board gets its Stories.

**Board Backlog Source:**

Sprint  
Stories that are assigned to a Sprint.

Release  
Stories that are assigned to a Release.

Custom Filter

### Fully Customizable Swimlanes

Add as many swimlanes as your board needs. Drag and drop their positioning.

Configure the **WIP Limit**, **Age Indicator**, and **Story Status Mapping**.

**Swimlanes:** [New](#) | [Refresh](#) | [Delete](#)

	Name	WIP Limit	Age Indicator	Story Status Mapping
<input checked="" type="checkbox"/>	Define	∞	1 day	Not Started
<input checked="" type="checkbox"/>	Dev in Progress	6	4 days	In Progress
<input checked="" type="checkbox"/>	QA in Progress	3	2 days	In Progress
<input checked="" type="checkbox"/>	Functional Review	∞	No	Completed
<input checked="" type="checkbox"/>	Done	∞	No	Accepted

### Displaying *WIP limit* and Age Indicators

Choose display options for your board.

- Enforce WIP**  
Do not allow Stories to be added to Swimlanes that have reached their WIP limit.
- Show Age Indicators**  
Highlight Stories that have been in their current Swimlane for too long.
- Make Available In Team Room**  
List the Kanban Board in the Team Room menu.

**FOR ALL USERS**

**Team Room Menu**

Select one of the boards from the menu.

- Team Room**
- Pending Features (in definition)
- Priority Customer Issues
- Release 2.0

**Comprehensive Info Pane**

Navigate boards, review team stats, see important board information, use Discussions.

< **Feature Work** >  
 Backlog Source: Sprint
 Cycle Time **6.2** days
 WIP Summary **32** items
  2 CARDS BLOCKED

**Board Backlog Lane**

All Stories meeting the **Board Backlog Source** start in this lane. You can also change Sprints/Releases and use Find... to filter specific Stories in the **Board Backlog**.

**Board Backlog (0 of ∞)** <

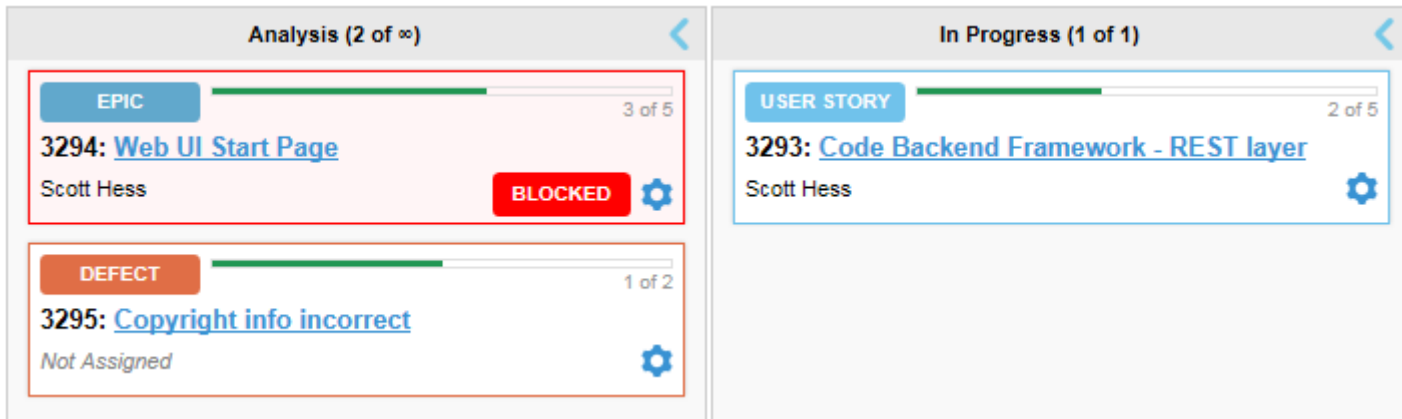

CDP Sprint 4 ▼

Find...

This lane is empty.

**Easy to Navigate Swimlanes**

Drag and drop your Stories from lane to lane.

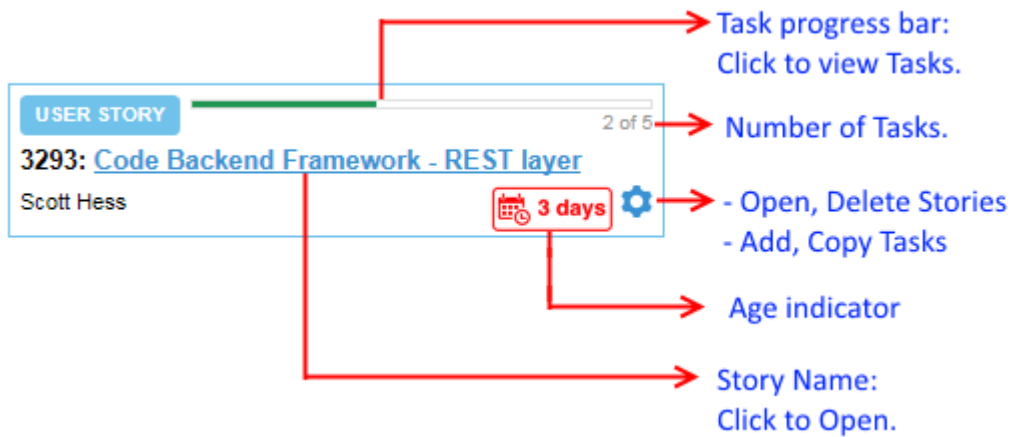

### Feedback on Card Movement

Rhythm provides feedback on whether you can move a card.

### Interactive Story Cards

The Story Card provides relevant Story details. Double click anywhere in the card to open the **Story Editor**.

### Task List Popup

Click the **Task Progress Bar** to view a Story's Tasks.

ID ↑	Type	Name	Owner	Estim...
<a href="#">5019</a>	DEV	API Calls	Administrator	5.00 Hr
<a href="#">5020</a>	DEV	Database Model	Scott Hess	10.00 Hr
<a href="#">5021</a>	DEV	Schema Editor	Scott Hess	6.00 Hr
<a href="#">5022</a>	QA	Test	Administrator	0.00 Hr
<a href="#">5023</a>	DOC	DOC	Administrator	0.00 Hr

## Board-Centric Filtering

Filter your Board on **User**, **Type**, or **Tag**.

User:  Type:  Tag:

## Quick Add

Your board is fully configured but doesn't have the Stories you need? Just add them! They are added to your first lane (after **Board Backlog**).

New Story: [Quick](#) [Detailed](#)

## Kanban Cumulative Flow

The Info Pane provides access to the Kanban Cumulative Flow diagram. 

All of these features are documented in detail in the Rhythm Online Help.

## Work Record Management

The **Task Editor** now contains a **Work Record** pane with a grid listing all work records for the Task. You can add/remove/edit any work record in the list.

## Rollup Column

The **Rollup** column displays the total planned points for all items contained within a parent item. It is available in the **Breakdown** view and **Sprints** Panel. Leaf items show the same value in both the **Points** and **Rollup** columns. Whereas the **Points** field is a manually entered value, the **Rollup** field is calculated. This allows you to compare the two values when actual (**Rollup**) may be greater than planned (**Points**).

## Tests Tab in Story Editor

The **Tests** tab in the **Story Editor** displays the test results returned by your connected testing tool.

# License Management

Atlas Planning and Tracking Suite now provides the ability for Administrators to manage *Named* licenses per user, in addition to *Concurrent*.

## 4.2

The following are the latest features for Rhythm:

### Web-Based Training

Use the following link to order the new, free Rhythm web-based training. Order it [here!](#)

### User Capacity Planning

This release introduces user capacity planning:

**Individual User Capacity** Each user can now customize their availability at both the Project level and the Sprint level. You can see these values reflected for each user by using a Quick Filter for a user in the **Team Room** and also in the Task **Owner** field.

**Administrator Manages Availability** Although individual users can modify their own availability (see above), each administrator can open the **Edit Sprint** window and use the **Team Availability** grid to change the availability for each user for the *current* Sprint and Project.

**Note:** This applies to *Private* Projects only.

**Task Owner Assignment** To aid in deciding who is available to work on a certain Task, the **Team Room** and **Story Editor** now display all users availability when you attempt to assign a user to a Task that is in a Sprint.

This indicates if a team member is over- or under-allocated for the Sprint.

### Quick Find

When you are in the **Breakdown** and **Backlog** views of the **Planning** perspective, you can use the **Quick Filter's** text field to search for text in the current view. This capability is invaluable for quickly finding items in the **Backlog**:

1. Place cursor in the **Quick Filter's** text field.
2. Type in the text to search for.
3. Click **Enter**.

This will behave exactly as if you opened the **Filter** dialog box and created a filter using `Name Contains <Text>` or `ID Equals <Text>` (the second part is only if the text is numeric).

### Search

Rhythm now provides search capabilities for Stories. Using the search, users can easily scan all Stories and their attributes, including the content of attached files. Used together with the Quick Find and Filtering, all data is quickly at your finger tips.

# Change Package Support

Rhythm now provides visibility to change sets/packages and their contents directly from the Rhythm user interface. When your native SCM environment is connected to the Atlas Hub, Rhythm includes change sets/packages in the relationship diagram and Story/Tasks lists. Understanding related files and impacts provides users greater understanding of work context.

These Stories display the Change Packages in the **Team Room** via the **Impact** column.

Additionally, any Change Packages associated with a Task are visible in the **Story Editor**.

When viewing relationships in a Story, Change Packages display in the diagram and you can click them to open the **Change Packages Viewer**.

# Accessing Stories in Native SCM Environments

Rhythm provides direct Story and Task links to the StarTeam Cross-Platform Client when Atlas Hub file activity is detected. Task links can be used to establish StarTeam Cross-Platform Client work context for developer activity, for example, check-ins. Check-in's in task context automatically create related changes packages that are in turn visible in Rhythm. Just click the **ID** field in the **Story Editor**.

# Relationship Impact Management

Rhythm now provides more ways to understand related work and the impact of change. Using the relationship diagram, users view related items and can filter on item type, relationship type, or relationship status. This aids in quickly understanding how data is related and how change propagates through related items.

## Team Room Cumulative Flow

The **Team Room Cumulative Flow** chart represents the amount of work in the Sprint in different states for each day of the Sprint. The vertical axis represents the points in the Sprint. The horizontal axis represents each day of the sprint. It includes **Points Not Started** (light green), **Points In Progress** (green), **Points Completed** (dark green), and **Points Accepted** (blue). The height of the chart defines the scope. If something is added or the estimate is increased, then the whole chart gets taller. If something is removed or the estimate decreased, then the chart gets smaller. It provides the ability to see changes in scope in the sprint.

Additionally, when a Quick Filter is applied, the chart adjusts to the items selected in the Filter.

## Tracking Cumulative Flow

The **Tracking Cumulative Flow** chart represents the amount of work in the Release in different states for each Sprint of the Release. The vertical axis represents the points in the Sprint. The horizontal axis represents each Sprint of the Release. It includes **Points Not Started** (light green), **Points In Progress** (green), **Points Completed** (dark green), and **Points Accepted** (blue). The height of the chart defines the scope. If something is added or the estimate is increased, then the whole chart gets taller. If something is removed or the estimate decreased, then the chart gets smaller. It provides the ability to see changes in scope in the Release.

## Team Room Burndown Chart

The **Team Room Burndown** chart now displays (1) Capacity (2) ideal Burndown (3) current Burndown and (4) Burnup. Additionally, when a Quick Filter is applied, the chart adjusts to the items selected in the Filter.

## Sprint Activity Window

The **Sprint Activity** window is available in the **Team Room** for the **Sprint List** and **Sprint Cards** views. It provides activity that occurs on all Tasks, Stories, and Discussions for all users. You can filter Tasks by **Date** (From, To), **Type**, **User** and many more (see below). You can use this information to:

- Provide detailed support or explanation for data in the **Team Room** Charts (status changes, work record hours, etc).
- Filter by **Type** to see what was Added/Created or Removed/Deleted and by whom. You can also isolate Tasks by: Edited, Worked, Discussed, Carry Over, Blocked/Unblocked.
- Use the data however you need to as the basis for your daily stand-ups or Sprint retrospective.

From the top-right of the **Team Room**, click the **Sprint Activity** button: .

## Decorators for Story Tabs

In the **Story Editor**, the tabs for **Discussions** , **Attachments** , **Relationships** , and **Tags**  will now show orange decorators when items exist.

## Team Room Points By Type

The **Team Room Points By Type** chart is now clickable and will apply a filter with the items selected. Use this bias chart to quickly understand the allocation distribution for Epic, Themes, Stories, Defects, and Tech Todo's. Additionally, when a Quick Filter is applied, the chart adjusts to the items selected in the Filter.

## Team Room Health Auto-Filters

The **Team Room Health & Progress** chart is now enabled with clickable auto filters. When warning labels are clicked, for example  1 Story without Tasks, the full **Team Room** is automatically filtered to show only those items matching the criteria. Locating health and progress issues has never been easier.

## Filter Sensitive Team Room Charts

Team room filtering has been updated to apply to not only the grids, but also to all visible charts and health. As selection filters are applied/removed, **Team Room** charts and health are updated to reflected the target data. The available filtered **Team Room** charts enable you to quickly identify trends and problem areas. Click the clear icon (✖) to clear any filter.

## Copy Tasks Preview Window

The new **Import Task** preview capability  enables you to quickly identify which Story to copy Tasks from. It provides a one-click action to provide visibility to selected Story Tasks before electing to copy them. This lets you accurately copy predefined Tasks from existing Stories and templates.

## Project Quick Switch

You can now use the **Switch Project** menu (available in all perspectives) to quickly change from the current Project to any of your *Favorite* Projects.

### 4.1

The following are the latest features for Rhythm:

## Attachments

Stories allow you add file attachments, just like Atlas. Refer to the topic titled *Using Attachments with Stories* in the online help.

## Bulk Edit in Grids

You can now perform bulk edits on multiple rows for any visible column in grids.

## Customizable Swimlanes

Task **Status** values are now customizable.

<b>For Administrators</b>	In <b>Admin Tools</b> , click the <b>Task Status/Swimlanes</b> tab to create new <b>Status</b> values and enable the ones you want the team to use.
<b>Users</b>	In <b>grids and the Story Editor</b> The <b>Status</b> control will contain the number of <b>Status</b> Values that are defined. Just click the Value.

## In the Team Room

When you select a Story in the **Sprint Cards** view, your tasks display in columns based on the Status Values. Simply drag-drop the Task to change the **Status**.

## Discussions

Stories in Rhythm allow you to have Discussion Topics, similar to those in Atlas. Refer to the topic titled *Discussions* in the online help.

## Import/Export

You can now import Stories into or export Stories out of a CSV file.

**Import** Use your favorite CSV editing tool, such as Microsoft Excel, to create Stories and import directly into Rhythm.

**Export** Export selected Stories out of Rhythm and use your tool of choice to consume the data.

## Input Streams

Input Streams () enable business and quality teams to work in seamless cadence with the Agile development team. Using Micro Focus Connect, *Input Streams* allow you to pull in external Requirements and Defects into the Rhythm **Breakdown** view for you to review and discuss. If you then choose to *Accept* them, new Epics/Defects are created in Rhythm with clear traceability back to the original external asset. This link provides a mechanism for feedback to the original author.

## Relationships

You can now create direct, traceable relationships from Story to Story. Further, you can view and track the relationship directly back to the Requirement or other related asset in Atlas and monitor and action any changes. Refer to the topic titled *Relationships* in the online help.

## StarTeam Agile Replacement

StarTeam Agile customers should now use Rhythm as their agile tracking tool. If you plan to continue to use StarTeam Agile, you need to open the `ALMConfiguration.xml` file and change this value: `<goToStarTeamAgile>TRUE</goToStarTeamAgile>`. Additionally, refer to the installation guide to learn about enabling the StarTeam Agile `.WAR` file.

## Tags

You can now *Tag* Stories. This provides the ability to tag similar Stories with relevant labels to group and review the items together. Refer to the topic titled *Using Tags* in the online help.

## Versions

Stories now save versions for every time the Story is changed. You can easily see how the Story changed by comparing the differences. Refer to the topic titled *Viewing and Comparing Versions of a Story* in the online help.

## 4.0

### Rhythm

Rhythm is the new delivery-focused application within the Atlas Planning and Tracking Suite allowing agile teams to breakdown and manage work delivery in agile cadence. Some features include:

- Enables definition and breakdown of program objectives into actionable stories.
- Defines/manages sprints and team releases.
- Collaborate and status with the Team Room's List and Card views.
- Tracks progress against defined dates and payloads.

# System Requirements

Rhythm has the following system requirements:

## Server

### Operating Systems

- Microsoft Windows Server 2012 R2 (64-bit).
- Microsoft Windows Server 2012 (64-bit).
- Microsoft Windows Server 2008 R2 SP2 (64-bit).

### Hardware

Minimum 64-bit quad core system with 16 GB RAM.

## Client

### Browsers

- Internet Explorer 11+.
- Mozilla Firefox, recent versions.
- Google Chrome, recent versions.

**Note:** Other products used within Atlas Planning and Tracking Suite, for example, Micro Focus Connect, have their own set of system requirements. Please refer to the *Release Notes* for those products.

### Screen Resolution

Minimum 1680x1050 resolution.

## Databases

supports both 32-bit and 64-bit databases. The following databases have been tested and are supported:

- Microsoft SQL Server 2014
- Microsoft SQL Server 2012 Express
- Microsoft SQL Server 2012 SP1
- Microsoft SQL Server 2008 Express R2
- Microsoft SQL Server 2008 Express
- Microsoft SQL Server 2008 R2 SP2
- Microsoft SQL Server 2008 SP3
- Oracle Database 12c version 12.1.0.2.0
- Oracle Database 11g R2
- PostgreSQL 9.3

**Important:** Never modify database contents or vault files other than through the client or the Server Administration Tool. Direct database manipulation is unsupported.

### Database User and Password

The PostgreSQL database server installed by default with has two default users created:

- Admin user = `postgres`
- Superuser = `Borland_Login`

The password for both is `Borland_123`.

When you use the default PostgreSQL database, you will be asked for a **System Password**. It is the same as the Admin user password, `Borland_123`.

# Integrations

The following describes how Rhythm integrates with other products:

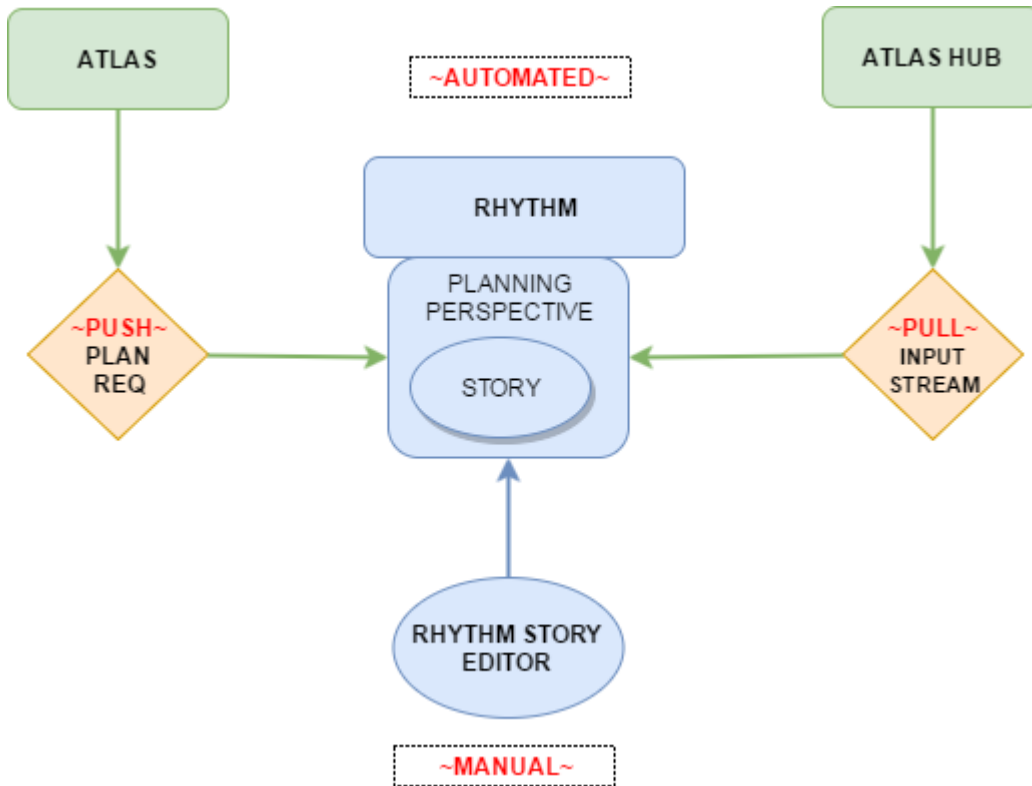

**Atlas** Atlas and Rhythm are tightly integrated, even sharing Projects and Users. You *Push* Requirements from Atlas into Rhythm as Epics, using one of the following methods:

**Individual Requirement** From the Gear menu (⚙️) of a Requirement, select **Send to delivery Backlog**.

**Full Plans** In the Atlas **Plan** perspective, edit a plan and click **Send to delivery Backlog**.

**Micro Focus Connect** This application allows you to synchronize your Requirements/Defects from third-party applications into the Atlas Hub. Then, you can create Input Streams to pick and choose which items to import as Stories. Some examples include Rally, Microsoft Team Foundation Server, JIRA, and VersionOne.

The following diagram illustrates how Stories can be added to Rhythm:

# Known Issues

This section identifies known issues in Rhythm.

## Enhanced Security Bundle (ESC) Windows Server Editions

If Atlas does not show the login dialog after installation on Window Server 2008, 2012 or 2012 R2, there may be an issue with ESC.

You can disable ESC using the Administrator tools. For more information, go to <https://technet.microsoft.com/en-us/library/cc775800%28v=ws.10%29.aspx>.

## IIS Conflict with Default Port

If after installation, the Atlas Apache server fails to start, check if there is an IIS Server running. It may be listening on port 80. The installer prompts the user if IIS should be stopped as a service. If a user clicks **Next** without stopping the IIS service, the Apache server fails to start.

## Timeout on First Login

Occasionally after starting the server, Atlas times out on the very first login. Data caching on the first access takes a long time and causes Atlas to time out. The timeout does not indicate a serious problem, and you are able to login subsequently without problems.

# Updates and SupportLine

Our Web site gives up-to-date details of contact numbers and addresses.

## Contacting Micro Focus

Micro Focus is committed to providing world-class technical support and consulting services. Micro Focus provides worldwide support, delivering timely, reliable service to ensure every customer's business success.

All customers who are under a maintenance and support contract, as well as prospective customers who are evaluating products, are eligible for customer support. Our highly trained staff respond to your requests as quickly and professionally as possible.

Visit <http://supportline.microfocus.com/assistedservices.asp> to communicate directly with Micro Focus SupportLine to resolve your issues, or email [supportline@microfocus.com](mailto:supportline@microfocus.com).

Visit Micro Focus SupportLine at <http://supportline.microfocus.com> for up-to-date support news and access to other support information. First time users may be required to register to the site.

## Information Needed by Micro Focus SupportLine

When contacting Micro Focus SupportLine, please include the following information if possible. The more information you can give, the better Micro Focus SupportLine can help you.

- The name and version number of all products that you think might be causing an issue.
- Your computer make and model.
- System information such as operating system name and version, processors, and memory details.
- Any detailed description of the issue, including steps to reproduce the issue.
- Exact wording of any error messages involved.
- Your serial number.

To find out these numbers, look in the subject line and body of your Electronic Product Delivery Notice email that you received from Micro Focus.

## Creating a Dump File

If reporting a protection violation you might be asked to provide a dump ( .dmp) file. To produce a dump file you use the Unexpected Error dialog box that is displayed when a protection violation occurs. Unless requested by Micro Focus SupportLine, leave the dump setting as `Normal` (recommended), click **Dump**, then specify a location and name for the dump file. Once the dump file has been written you can email it to Micro Focus SupportLine

You may also be asked to provide a log file created by the Consolidated Tracing Facility (CTF) - a tracing infrastructure that enables you to quickly and easily produce diagnostic information detailing the operation of a number of Micro Focus software components.
