

Rumba 9.4

A large, decorative graphic consisting of several overlapping, wavy blue lines that create a sense of motion and depth. The lines are in various shades of blue, from light to dark, and are arranged in a way that suggests a ribbon or a path. The graphic is positioned in the lower half of the page, partially overlapping the text area.

About centralized management

The Micro Focus Host Access Management and Security Server (MSS) allows a system administrator to remotely deploy Rumba configuration package files to users. This feature is available as a HotFix for Rumba 9.4. You can download the HotFix from the [Micro Focus SupportLine](#) site.

System administrators can configure all aspects of a Rumba desktop environment, including:

- Session profiles
- Desktop profiles
- Keyboard mapping
- Macros
- Scripts

System administrators then use the Micro Focus Package Manager to create a .MSI installation package file and deploy the file to users with the MSS.

Prerequisites

- Rumba 9.4 must be installed before you install the HotFix.
- Your machine must have a working connection to an MSS server.

Installing and using centralized management

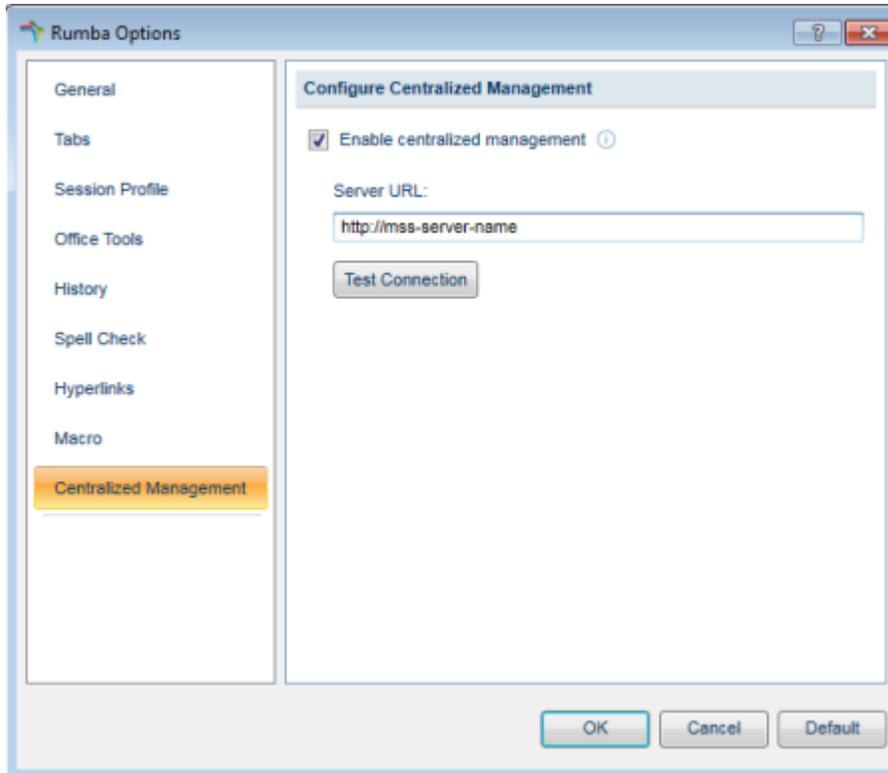

For information about how to install and use MSS and the Package Manager, refer to the respective product documentation.

Installing the HotFix

1. Download the HotFix file from the *Product Updates* page on the [Micro Focus SupportLine Web site](#):
Rumba 9.4 MSS HotFix (English EXE)
2. Double-click either the .EXE or .MSP file to start the setup wizard.
3. Follow the instructions in the setup wizard.

Enabling centralized management

1. On the Rumba toolbar, select **Options > Rumba Options**.
The **Rumba Options** dialog box appears.
2. In the left pane, select **Centralized Management**.
3. In the **Configure Centralized Management** pane, check **Enable centralized management**.
4. In the **Server URL** field, type the URL of the MSS server.

5. Click **Test Connection**
The result of the test appears below the server list.
6. Click **OK**. A message box appears advising you to restart Rumba.
7. Click **OK**.
The **Rumba Options** dialog box closes.
8. Restart Rumba.

 **Note:** If the test connection to the server fails, contact your system administrator.

Using Rumba with centralized management

1. When you start Rumba, Rumba connects to the MSS server.
2. If the server requires authentication, you are prompted for a user name and password.

If any configuration package files are available for download, Rumba downloads them and installs their contents ready to be used in your next session.

Contacting Micro Focus

Our Web site gives up-to-date details of contact numbers and addresses.

Further information and product support

Additional technical information or advice is available from several sources.

The product support pages contain a considerable amount of additional information, such as:

- The *Product Updates* section of the Micro Focus SupportLine Web site, where you can download fixes and documentation updates.
- The *Examples and Utilities* section of the Micro Focus SupportLine Web site, including demos and additional product documentation.
- The *Support Resources* section of the Micro Focus SupportLine Web site, that includes troubleshooting guides and information about how to raise an incident.

To connect, enter <http://www.microfocus.com/SupportLine> in your browser.

Note: Some information may be available only to customers who have maintenance agreements.

If you obtained this product directly from Micro Focus, contact us as described on the Micro Focus Web site, www.microfocus.com. If you obtained the product from another source, such as an authorized distributor, contact them for help first. If they are unable to help, contact us.

Also, visit:

- The Micro Focus Community Web site, where you can browse the Knowledge Base, read articles and blogs, find demonstration programs and examples, and discuss this product with other users and Micro Focus specialists. See <http://community.microfocus.com>.
- The Micro Focus YouTube channel for videos related to your product. See <https://www.youtube.com/user/MicroFocusIntl>.

Information we need

However you contact us, please try to include the information below, if you have it. The more information you can give, the better Micro Focus SupportLine can help you. But if you don't know all the answers, or you think some are irrelevant to your problem, please give whatever information you have.

- The name and version number of all products that you think might be causing a problem.
- Your computer make and model.
- Your operating system version number and details of any networking software you are using.
- The amount of memory in your computer.
- The relevant page reference or section in the documentation.
- Your serial number. To find out this number, look in the subject line and body of your Electronic Product Delivery Notice email that you received from Micro Focus.
